

Your new job opportunity at TrigasDM

Do you enjoy taking on an interesting task in our medium-sized and very flexible company? We offer you on-the-job training in a competent and international team with responsibility from day one.

TrigasDM® GmbH is one of the leading specialists in flow measurement technology. Our innovative services are highly recognized by our customers worldwide. Due to our continuous growth, we offer you a secure job and many opportunities to actively contribute to the company's development.

We are currently seeking for an experienced:

Cloud Development Engineer (m/f/d)

We are looking to hire a cloud development engineer for developing and deploying applications in cloud settings. He/she will work along with cloud service providers and other specialists to build, test, and deploy software that complies with our organizational needs. In addition to development experience, a solid understanding of cloud systems is required - not only how they operate, but how to deploy them securely, efficiently, and with little-to-no downtime.

The ideal candidate will have an understanding of measurement instrumentation and storing in databases of measurement and calibration data that can be accessed and manipulated for purposes of report generation by clients and coworkers alike.

Responsibilities

- Develop cloud-based solutions and applications
- Design, deploy and maintain cloud infrastructure
- Understand the current application infrastructure and suggest changes to it
- Creation of databases and dashboards on the cloud
- Migrate our infrastructure with zero downtime to a highly available, scalable one.
- Create and maintain documentation for cloud solutions and infrastructure
- Monitor and troubleshoot issues with cloud infrastructure
- Ensure security and compliance of cloud infrastructure
- Stay up-to-date with new technologies and trends in cloud computing
- Define service capacity planning strategies

General Requirements and Skills

- Relevant bachelor's degree in Computer Science, Information Technology or related field
- 2+ years of experience in cloud computing or related field
- Strong familiarity with the basics of cloud architecture and design
- Ability to connect devices to the cloud IoT (internet of things)
- Knowledge of cloud computing systems like Amazon, Azure, or Google Cloud
- Experience with building or maintaining cloud-native applications

- Understanding of scripting languages like PowerShell, Python, or Bash
- Understanding of Networking, DevOps, Scaling, Security, Microservices
- Strong capabilities for collaboration and communication
- Ability to function both individually and as a team

Development Specific Skills

- Programming
- API Design
 - Java, Scala, Python
 - Object-oriented programming
- Database creation and management
- Scripting

From us | what you can expect

- Pleasant working atmosphere and good team spirit
- Permanent employment relationship and a secure workplace
- Easy start through extensive on-the-job training
- International and team-oriented working environment
- Development opportunities in a rapidly growing company
- Good transport connections & sufficient parking space for cars and bicycles
- 30 days vacation
- Performance-related pay
- Various company events
- Further education & training

We look forward to receiving your application at **personal@trigasdm.com!**
